Improve Existing Route
Spot Improvements
NOTE:
Alternative 1P represents a lower-cost "practical solution" for KY 32. It includes horizontal and vertical improvements at ten (10) selected "spot locations" based on crash history and design deficiencies. This consists of reducing curves and grades, improving sight distance, widening lanes and shoulders, and improved signing, striping, and/or traffic engineering features. Alternative 1P also includes minor widening of lanes and shoulders along the remainder of KY 32 (i.e., between the "spot locations).
